MEMORANDUM FOR THE RECORD

SUBJECT: MKULTRA Telephone Conversation with Walter Sheridan/Kennedy Com.

1. On 25 July about 1600 hours, I talked with Sheridan regarding recent developments in our search for victims. I indicated that I thought a call was appropriate because considerable progress had been made since we submitted the "Final" report and due to the possibility of publicity of one or more of the cases, and because some of the information developed had taken a different twist. He asked a number of questions during our conversation, and the net result was that I reported essentially the following information to him:

a. We had identified and informed several more "victims."

b. A [redacted] has been reported and apparently the Whites and some of the "victims" [redacted] and some of the LSD experiments took place during those sessions.

c. One female victim became paranoid about 6 years after the alleged LSD experience, was hospitalized, and ultimately died in an asylum. She apparently had a baby with her at the Whites at the time she was dosed. Her husband with whom I talked was not at the time of our conversation inclined to assume that the LSD experience had caused her mental problems.

d. One woman who received LSD has announced her intent to sue.

e. Several others who appear to have gotten LSD do not recall any strange experiences and do not believe they got a drug.

f. We have the names of three additional persons for whom we are still searching.

2. I indicated that these events were reported in this way only because the potential for publicity was there and the information had developed since the "Final Report" had been submitted. Should these

events come to their attention through other channels, we did not wish them to get the impression that we were being less than candid with them. I indicated a supplementary report would follow as soon as work now underway to locate the three remaining persons thus far identified is completed.
